QTimer®
TIME IS MONEY

QTimer®

EeeBox

The HyperActive Technologies® Promise

We are committed to creating the leading innovations that help our restaurant partners achieve greater throughput and profitability at the lowest cost of ownership. We promise to be a company of firsts – delivering technological solutions such as Power over Ethernet for our leading Order Confirmation Displays and cloud-computing drive-thru management systems that continue to move the market.

Get the Data. Generate Profits.

Now you can do both with QTimer,® the world's most reliable drive-thru timer designed and built by the experts at HyperActive Technologies.®

Your restaurant will reap the benefits of deploying QTimer as part of your overall drive-thru system. QTimer helps you follow the money. Literally. It follows the flow of vehicles in your drive-thru and integrates with virtually any POS system – giving you the comprehensive knowledge and control you need to generate more profits.

Cars running slow? Now you can fix it. QTimer gives you the actionable data you need to make just-in-time decisions that will make you more successful.

QTimer. Proven Results You Can Measure.

Whether it's one store or 100 stores, you can easily track and respond to issues that could negatively impact your profitability.

When you need the right kind of metrics to run your restaurant correctly, you need QTimer.

QTimer Difference

- POS Integration each vehicle is matched with an order number
- Measure multiple service points simultaneously
- Visual representation of cars in line
- Daypart service times right on the dashboard
- Track and compare performance toward goals
- Above-store reporting makes data available via PC or Smartphone
