QTimer® Drive-thru Management System

QTimer®

- » Product enhancements without requiring hardware upgrades
- » A software solution provides capabilities that can not be duplicated, e.g. custom exports
- » Utilizes real-time integration to the POS independent of OCB
- » Real-time POS integration shows order number right on the screen while the car is in the lane
- » Above store reporting allows access to reports from any web-browser
- » 3 year warranty is unrivaled in the field

The Competition

- » System upgrades are firmware dependent
- » Export capability is non-configurable without custom brand development
- » Limited POS integration
- » Real time POS integrations requires OCB solution and information is limited
- » Standard warranty is 1 year
